

JOURNi is an organization dedicated to equipping urban communities with the skills and resources necessary to jumpstart their local economies. We strive to build an authentically inclusive tech ecosystem in the city of Detroit, by tapping into the heart and spirit of its residents. To achieve this goal, we will provide immersive courses, youth-centered programming, beneficial employment opportunities, startup education, and socioeconomic resources.

To further serve the Metro Detroit Community, JOURNi has started their Digital Solutions Development Shop in part staffed by JOURNi students. We shape ideas into viable products and stunning solutions. JOURNi provides support and expertise through services focused on product strategy, user experience, design, and development.

Headquartered in Detroit, we are a one-stop shop for our clients' digital strategy needs. Our clients range from dynamic startups to inspiring enterprise-level organizations. Our core capabilities include Digital Product Design & Development, Mobile Application Development, and Web Development. Through our numerous digital development experiences, we will provide committed quality support services on time and within budget.

JOURNi has a standard rate of \$75.00 per hour. When working with nonprofits, JOURNi applies a 25% discount. Our rates help to support JOURNi as a non-profit in addition to the web development staff which may also include student developers.
